Stanislav Svoboda

Frontend developer (React, TypeScript) who works effectively with AI agents.

I build web interfaces in React and TypeScript. I plan my work with AI agents, review what they write and keep the result simple, tested and readable. This site shows the path that got me here and the projects I built along the way.

Experience

Self-employed surveyor 2017 – present

My own surveying business: surveying buildings, streets and bridges including 3D models, documenting sewers and water mains to the Prague water utility's (PVK) standard, setting out buildings and tram tracks, and surveying on motorway, bridge and tunnel construction.

Surveyor 2007 – 2017

Geoservis Praha s.r.o.

Surveying in the field and drawing maps and plans from the measurements.

Education and courses

AI Coding Crash Course workshop September 2026

AI Hero

Planning, building and reviewing software together with AI agents.

Frontend developer course January 2025 – August 2025

Coders Lab

An intensive course in HTML, CSS, JavaScript and React, finished with a final project.

Secondary school of surveying 2002 – 2006

Střední průmyslová škola zeměměřická

Four years of studying surveying: measuring in the field, maps and geodetic calculations.

Featured projects

Park Hřiště

My Coders Lab final project: a map and list of Prague's parks and playgrounds built on the city's open data.

`React, JavaScript, Tailwind CSS`

svoboda.page

This site: a bilingual presentation built test-first with AI agents.

`React, TypeScript, TanStack Start, Tailwind CSS`

Skills

Use daily	React, TypeScript, JavaScript, HTML, CSS
Have experience with	Tailwind CSS, SCSS, Git
Learning	TanStack Start, Vitest

Languages

Czech: Native

English: Pre-intermediate
